## RAINBOW INNER SPECTRUM

Setting requires technical rigor and know-how. The presence of precious stones sublimates a watch and the wrist that wears it. Watch and jewel become one! Rebellion Timepieces is a master in the art of breaking free from aesthetic codes and demonstrates its ability to transcend watchmaking with creations that virtuously mix genres. Rebellion Timepieces is no stranger to breaking conventions with resolutely chic and sporty set pieces, and its two new models are no exception to the rule.

The multicolored Predator S Rainbow Inner Spectrum, with its bezel and dial enriched with 102 sapphires in total, sets the tone. Sporty at heart, refined in essence, it combines the best of Rebellion Timepieces' racing experience with the meticulous expertise of the jewelers. With this exceptional new piece, the art of jewellery and help of a delicate setting together showcase uncompromising watchmaking, creating a joyful composition and a visual thrill.

The intense colour of the sapphires creates a perfect contrast with the technical case, made in rose gold. With an offbeat sport-chic feel, the hour and minute hands are coated with luminescent material and point to discreet matching indices, making time keeping a beautifully colourful experience under all light conditions. The central second hand features a counterweight in the shape of the Rebellion Timepieces logo. The watch also features a date display at 3 o'clock. All this time information is powered by a Swiss Made self-winding mechanical movement that gives the Predator S Rainbow Inner Spectrum 48 hours of power reserve.

Completing this exclusive model is a comfortable brown rubber strap, perfectly integrated with the case and fastened with a deployant clasp: ideal for all wrists in search of daring and elegance. With the Predator S 3 Hands Rainbow Inner Spectrum, Rebellion Timepieces presents a sublime, impertinent design that is perfectly in keeping with the times.

UNIQUE PIECE

GEMSTONE SETTING
