## 3 HANDS CARBON COLORED

Always in search of innovation and excellence, Rebellion Timepieces explores unknown horological lands and adopts a high-tech evolution: Colored Carbon!

With its bold design, the Re-Volt 3 Hands Carbon Colored offers a captivating insight into the uncompromising mechanical universe of Rebellion Timepieces. This year, the new variations push the limits of convention even further with the help of this contemporary material. Today more than ever, it is imperative to camouflage yourself so as not to go unnoticed.

Like all Rebellion Timepieces watches, the design of the Re-Volt 3 Hands Carbon Colored is at the service of performance. The strong masculine silhouette of its rectangular case serves as a framework for a mechanical scenography in relief highlighted by the light which then enhances each of its elements.

This year, Rebellion Timepieces offers an unprecedented visual experience with a case made of colored carbon. To achieve this remarkable result, Rebellion Timepieces uses a cutting-edge process. Originally a carbon base, in fibre or powder, is mixed with an epoxy-type resin. Tinted pigments are then added. However, the more pigments that are added, the more fragile the material becomes. To counter this risk, the use of technical carbon, in the form of roving, a coil composed of carbon threads, with superior rigidity, helps to produce this colorful camo pattern.

As the result, the famous camouflage pattern takes on colors and enhances the multiple grey tones of the carbon of the Arctic Storm, Black Dunes, Mars Valley, Purple Haze, Toxic Storm and for the first time ever, of the Forged Cabon Luminova!
