

## GMT

*Exclusive caliber developed for REBELLION by Telos Watch*

*Self-winding movement GMT*

### **Introduction**

REBELLION Timepieces was born of the same passion for perfect mechanics as REBELLION Racing. Unique bodywork, exceptional technical materials, exclusive engines and outstanding performance: each collection pays tribute to the spirit of competition and car racing.

The Predator 2.0 GMT is the ultimate technical and aesthetic fusion between racing cars and fine watches. The unique display is directly inspired from the brakes of racecars, which, like the engines, are an integral part of the vehicles' performance, power, endurance, resistance and reliability! In fact, wearing the Predator 2.0 Regulator GMT is like pushing the brake pedal of a racing car. The dashboard features an astonishing hour hand made up of a disc with a red caliper. You can plan to drive your watch at any of the world's great tracks, from Daytona to Le Mans, thanks to the large, round time zone indicator.

### **The Case**

A complex assembly of superimposed layers, the case's design is both robust and modular. Available in titanium, titanium black DLC, compressed carbon and rose gold 5N.

### **The Movement**

The Predator 2.0 GMT is powered by an automatic Swiss Made engine. At the heart of this automatic GMT is a REBELLION propriety movement. Developed in collaboration with Telos and based on the ETA 2892 movement. Its unique mechanism is similar to a solar system. The 24-hours time zone indicator – a globe – simultaneously revolves around its own axis and around the central axis of the movement. Across the dial is the hour hand. Composed of a red caliper and white arrowhead, it orbits over the signature brake disc in classic REBELLION style.

*Displays and functions*

- 1- MINUTE HAND
- 2- HOUR HAND
- 3- SECOND TIME ZONE (GMT)
- 4- **POSITION 1** : WINDING (CROWN AT HOME POSITION)
- 5- **POSITION 2** : SETTING THE SECOND TIME ZONE (GMT)
- 6- **POSITION 3** : SETTING THE TIME

## Settings:

### Winding

Your timepiece is wound automatically by your wrist movements. With those movements your watch sets the winding mechanisms and stores the energy. When it is fully wound and off your wrist, your timepiece has a power reserve of 48 hours. If your watch has not been worn for some time, you must wind it manually by rotating the crown. To wind your watch, in **POSITION 1**, turn the crown clockwise approximately 10 full turns (1).

### Setting the Second Time Zone (GMT)

Pull the crown out (2) to **POSITION 2** and turn the crown clockwise to set the second time zone (3) - jumping correction. After having set the second time zone, push the crown back to the home position **POSITION 1**.

### Setting the Time

After pulling the crown (1) to (2), pull one more time the crown out - two clicks (4) to **POSITION 3**, adjust the hands to the correct time. And after having set the time, push the crown back to home position- **POSITION 1**.

## Recommendations: Care & Maintenance

For best care of your watch we advise:

- ✂ Clean your watch regularly with a gentle microfiber tissue to keep it in optimal condition.
- ✂ Avoid contact with water or sweat to prevent premature ageing of your leather strap.
- ✂ After immersion in chlorinated or salty water, rinse it in freshwater and leave it to dry completely.
- ✂ Avoid placing your timepiece anywhere where it might be subjected to major variations in temperature or humidity (e.g. sauna), or direct sunlight. Do not expose your watch to extreme temperatures (e.g. behind a car glass for long periods). Your watch's movement is designed to function ideally in temperatures ranging from 0°C to 50°C.
- ✂ Avoid placing your timepiece near strong magnetic fields (e.g. speakers, electrical motors, etc.) as they can affect the running of your timepiece.
- ✂ Avoid any contact with abrasives, hazardous gases, solvents, detergents, mosquito repellent, sun creams, perfumes, cosmetic products, or other chemical products as they may damage the watch case, the strap, the glass or synthetic parts of your watch.
- ✂ Avoid any type of shocks to your watch. In the event that your watch is exposed to any violent impact or shock, have your watch checked by REBELLION Timepieces immediately.

- ✂ Never use your watch's pushers, wind the watch or adjust time/date when the watch is wet or has had any contact with water. We recommend this to avoid water penetration, even if your timepiece is water resistant. This is to minimize risk of water entering the case and being exposed to moisture.
- ✂ Check if the crown is securely returned to the home position after each adjustment to prevent any water intrusion.
- ✂ We also recommend that you never adjust the date function between 8pm and 3am of a REBELLION timepiece as it could seriously damage the movement.

### HAVING YOUR WATCH SERVICED

To ensure the running of your watch, we advise regular service and maintenance by our workshop at REBELLION Timepieces S.A. As with any racing car, the exclusive motor of your timepiece needs regular servicing in order to function to its fullest potential. We advise you to have your watch serviced at least once every 3 to 5 years by our workshop at REBELLION Timepieces S.A. We suggest you to take your watch to an Authorized REBELLION Timepieces Retailer who will send it to our workshop where it will be inspected and analyzed by our watchmakers. During your watch's maintenance, the case and the movement will be completely disassembled, cleaned lubricated and reassembled. Then rigorous accuracy calibrations and water resistance tests will be performed. Upon request, the case and the buckle will be refinished and polished. The full

process takes several weeks because each watch must pass several tests to ensure REBELLION Timepieces' quality spirit.

If you have any questions about the servicing of your watch, please contact your Authorized Retailer or us directly at [www.REBELLION-Timepieces.com](http://www.REBELLION-Timepieces.com)

**WATER RESISTANCE**

Your Predator 2.0 GMT is 50 meters (5atm) water resistant. Water resistance cannot be guaranteed indefinitely. In case of intensive use underwater, annual pressure tests are recommended. Under normal conditions, we recommend testing every year. The pressure test takes only a few minutes and can be performed at any official center for REBELLION Timepieces or by an Authorized Retailer. A full list of retailers can be found on our website [www.REBELLION-timepieces.com](http://www.REBELLION-timepieces.com)
