

REGULATOR TOURBILLON

Exclusive REBELLION caliber developed with Telos watch

Self-winding regulator tourbillon movement with calendar (date)

Introduction

REBELLION Timepieces was born of the same passion for perfect mechanics as REBELLION Racing. Unique bodywork, exceptional technical materials, exclusive engines and outstanding performance: each collection pays tribute to the spirit of competition and car racing.

Precision and complexity are the heart of this movement developed exclusively for REBELLION Timepieces by Telos Watch. Disturbances caused by earth's gravitational pull are compensated by the tourbillon, displayed at 6 o'clock. Hours and minutes are indicated by two separated counters, while the large needle points to the seconds. As for automatic engine, it can reach an astonishing 65 hours of power reserve.

The Case

A complex assembly of superimposed layers, the case's design is both robust and modular. Available in titanium, titanium black DLC, rose gold and compressed carbon.

The Movement

This complicated, Swiss Made automatic regulator tourbillon movement – developed exclusively for REBELLION Timepieces – is based on the Telos Watch P351. Long known as “master clocks”, regulator clocks were housed in observatories and served as reference points for the precise adjustment of watches. The tourbillon, located at 6 o'clock, adds to the timepiece's stunning precision. Two parallel mounted barrels offer a power reserve of 65 hours.

Displays and functions

BEWARE:

To prevent damage to your timepiece, please never adjust the date function between 8pm and 3am of your REBELLION watch. This is the only way to ensure that the date mechanisms are not engaged. Changing the date when the mechanisms are engaged could seriously damage the movement. We recommend adjusting the date in the morning, around 7am.

Settings:

Preparation to setting

Your timepiece is wound automatically by your wrist movements. With those movements your watch sets the winding mechanisms and stores the energy. When it is fully wound and off your wrist, your timepiece has a power reserve of 60 hours. If your watch has not been worn for some time, you must wind it manually by rotating the crown between 30 and 50 times. To fully wind it, turn the crown 99 times. To wind your watch, in **POSITION 1** (1), turn the crown clockwise approximately 10 full turns (2).

Setting the Date

Pull the crown out (2) to **POSITION 2** (3) and turn the crown clockwise to set the date. After having set the date, push the crown back to the home position **POSITION 1** (1).

Setting the Time

After pulling the crown (1) to (2), pull one more time the crown out - two clicks (4) to **POSITION 3** (5), adjust the hands to the correct time. After having set the time, push the crown back to home position **POSITION 1** (1).

Recommendations: Care & Maintenance

For best care of your watch we advise:

- ✂ Clean your watch regularly with a gentle microfiber tissue to keep it in optimal condition.
- ✂ Avoid contact with water or sweat to prevent premature ageing of your leather strap.
- ✂ After immersion in chlorinated or salty water, rinse it in freshwater and leave it to dry completely.
- ✂ Avoid placing your timepiece anywhere where it might be subjected to major variations in temperature or humidity (e.g. sauna), or direct sunlight. Do not expose your watch to extreme temperatures (e.g. behind a car glass for long periods). Your watch's movement is designed to function ideally in temperatures ranging from 0°C to 50°C.
- ✂ Avoid placing your timepiece near strong magnetic fields (e.g. speakers, electrical motors, etc.) as they can affect the running of your timepiece.
- ✂ Avoid any contact with abrasives, hazardous gases, solvents, detergents, mosquito repellent, sun creams, perfumes, cosmetic products, or other chemical products as they may damage the watch case, the strap, the glass or synthetic parts of your watch.
- ✂ Avoid any type of shocks to your watch. In the event that your watch is exposed to any violent impact or shock, have your watch checked by

REBELLION Timepieces immediately.

- ✂ Never use your watch's pushers, wind the watch or adjust time/date when the watch is wet or has had any contact with water. We recommend this to avoid water penetration, even if your timepiece is water resistant. This is to minimize risk of water entering the case and being exposed to moisture.
- ✂ Check if the crown is securely returned to the home position after each adjustment to prevent any water intrusion.
- ✂ We also recommend that you never adjust the date function between 8pm and 3am of a REBELLION timepiece as it could seriously damage the movement.

HAVING YOUR WATCH SERVICED

To ensure the running of your watch, we advise regular service and maintenance by our workshop at REBELLION Timepieces S.A. As with any racing car, the exclusive motor of your timepiece needs regular servicing in order to function to its fullest potential. We advise you to have your watch serviced at least once every 3 to 5 years by our workshop at REBELLION Timepieces S.A. We suggest you to take your watch to an Authorized REBELLION Timepieces Retailer who will send it to our workshop where it will be inspected and analyzed by our watchmakers. During your watch's maintenance, the case and the movement will be completely disassembled, cleaned lubricated and reassembled. Then

rigorous accuracy calibrations and water resistance tests will be performed. Upon request, the case and the buckle will be refinished and polished. The full process takes several weeks because each watch must pass several tests to ensure REBELLION Timepieces' quality spirit.

If you have any questions about the servicing of your watch, please contact your Authorized Retailer or us directly at www.REBELLION-Timepieces.com

WATER RESISTANCE TABLE

WATER RESISTANCE

Your Predator 2.0 Regulator Tourbillon is 50 meters (5atm) water resistant. Water resistance cannot be guaranteed indefinitely. In case of intensive use underwater, annual pressure tests are recommended. Under normal conditions, we recommend testing every year. The pressure test takes only a few minutes and can be performed at any official center for REBELLION Timepieces or by an Authorized Retailer. A full list of retailers can be found on our website www.REBELLION-timepieces.com
