

RE-VOLT SKELETONIZED

Exclusively caliber developed for REBELLION by Concepto

Skeleton manual-winding movement

Introduction

Technicality, lightness, and purity of design: the RE-volt refuses to compromise. A perfect incarnation of the very essence and philosophy of REBELLION.

Smaller than existing models, its square shape and stylishly bold manufacture movement are beyond compare. Its sapphire crystal (transparent or slightly tinted) embodies watch styling

aesthetics with full transparency, enhancing its skeletonized movement that continually brings to mind the technical and stylistic audacity of car chassis. Playing provocatively with shadow and light, Re-Volt knows how to stand out from the crowd thanks to its "in-house" calibre, muscular silhouette, high-tech nature, and exceptional performance with its 48-hour power reserve. Every detail expresses and embodies a passion for motorsport.

Displays and functions

- 1- HOUR HAND
- 2- MINUTES HAND
- 3- CROWN AT HOME POSITION - WINDING
- 4- **POSITION 1** : SETTING THE TIME

Settings:

Winding your timepiece

Your watch is wound manually. Your timepiece has a power reserve of 48 hours. You must wind it manually by rotating the crown. At home position (1) - turn the crown clockwise approximately 30 full turns.

Setting the time

To set time, pull the crown out (2) to **POSITION 1**, adjust the hands to the correct time (4), then push the crown (5) back to the home position.

Recommendations: Care & Maintenance

For best care of your watch we advise:

- ✂ Clean your watch regularly with a gentle microfiber tissue to keep it in optimal condition.
- ✂ Avoid contact with water or sweat to prevent premature ageing of your leather strap.
- ✂ After immersion in chlorinated or salty water, rinse it in freshwater and leave it to dry completely.
- ✂ Avoid placing your timepiece anywhere where it might be subjected to major variations in temperature or humidity (e.g. sauna), or direct sunlight. Do not expose your watch to extreme temperatures (e.g. behind a car glass for long periods). Your watch's movement is designed to function ideally in temperatures ranging from 0°C to 50°C.
- ✂ Avoid placing your timepiece near strong magnetic fields (e.g. speakers, electrical motors, etc.) as they can affect the running of your timepiece.
- ✂ Avoid any contact with abrasives, hazardous gases, solvents, detergents, mosquito repellent, sun creams, perfumes, cosmetic products, or other chemical products as they may damage the watch case, the strap, the glass or synthetic parts of your watch.
- ✂ Avoid any type of shocks to your watch. In the event that your watch is exposed to any violent impact or shock, have your watch checked by REBELLION Timepieces immediately.

- ✂ Never use your watch's pushers, wind the watch or adjust time/date when the watch is wet or has had any contact with water. We recommend this to avoid water penetration, even if your timepiece is water resistant. This is to minimize risk of water entering the case and being exposed to moisture.
- ✂ Check if the crown is securely returned to the home position after each adjustment to prevent any water intrusion.
- ✂ We also recommend that you never adjust the date function between 8pm and 3am of a REBELLION timepiece as it could seriously damage the movement.

HAVING YOUR WATCH SERVICED

To ensure the running of your watch, we advise regular service and maintenance by our workshop at REBELLION Timepieces S.A. As with any racing car, the exclusive motor of your timepiece needs regular servicing in order to function to its fullest potential. We advise you to have your watch serviced at least once every 3 to 5 years by our workshop at REBELLION Timepieces S.A. We suggest you to take your watch to an Authorized REBELLION Timepieces Retailer who will send it to our workshop where it will be inspected and analyzed by our watchmakers. During your watch's maintenance, the case and the movement will be completely disassembled, cleaned lubricated and reassembled. Then rigorous accuracy calibrations and water resistance tests will be performed. Upon request, the case and the buckle will be refinished and polished. The full

process takes several weeks because each watch must pass several tests to ensure REBELLION Timepieces' quality spirit.

If you have any questions about the servicing of your watch, please contact your Authorized Retailer or us directly at www.REBELLION-Timepieces.com

WATER RESISTANCE

Your Re-Voltis 50 meters (5atm) water resistant. Water resistance cannot be guaranteed indefinitely. In case of intensive use underwater, annual pressure tests are recommended. Under normal conditions, we recommend testing every year. The pressure test takes only a few minutes and can be performed at any official center for REBELLION Timepieces or by an Authorized Retailer. A full list of retailers can be found on our website www.REBELLION-timepieces.com
